# Meeting of the Technical Steering Committee (TSC) Board

Wednesday, Mar 8th, 2023
11:00am ET

# Antitrust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

# Agenda/Updates

---

- Rocky Linux SIG

- Release updates

# Rocky Linux OHPC SIG

- Greg K @ CIQ wants to form an OHPC special interest group within the Rocky Linux project

- https://wiki.rockylinux.org/special_interest_groups/sig_guide/

- They are proposing tighter integration between Rocky and OHPC

- Pros? Cons? Thoughts?

# Release Schedule and Planning

- 3.0
  - Almost all packages in 3.0 Factory built against CentOS stream 9
    - For x86_64, still using old interfaces for Intel compiler
    - Will migrate to RHEL 9.1 builds once the new repo server config is ready
    - The ARM compiler not yet available but they'll let us know when it is
  - For Leap 15.4, almost all packages build
    - Only opencoarrays with the intel compiler failing
    - No ARM compiler available
  - OpenEuler
    - few minor bugs remain that the OpenEuler team is working through
